Abstracts

Preeclampsia is a multi-system pregnancy related condition affecting patients in their second or third trimester. The condition affects around 5% to 8% of pregnancies and presents serious health consequences to mothers and babies. Currently, no treatment has been approved by US FDA despite preeclampsia causing fetal and maternal mortality. It is characterized difficult to control hypertension and can damage end organs forcing immediate delivery so that it does not progress to the mother. It is caused by diverse placental dysfunctions.

Preeclampsia pipeline comprises of 9 drugs under active development as of April 2018. Of these, 2 drugs are in Phase 1 and 2 drugs in Phase 3. Further, 4 drugs are in Pre-clinical stage and 1 drug in research phase.

13 companies are developing the pipeline for Preeclampsia. Of this, rEVO Biologics, Inc has the highest phase compounds in pipeline. Mechanism of Action of most of the therapeutic candidates is cell replacements.

Three compounds have been awarded orphan drug status for Preeclampsia.

To assist researchers and business development managers, VPA Research has come up with a comprehensive report on Pre-eclampsia pipeline. The report provides insights into different therapeutic candidates in preclinical, research, discovery, NDA/IND, pre registration, phase 1, phase 2, and phase 3 trials). Drugs under development directly and through combination with other drugs are also included.

Current status, developmental phase, participating companies and entities, recent developments, orphan drug/fast track/other designations, drug class are provided for

each Pre-eclampsia pipeline product. Mechanism of Action and the target area of the pipeline product are also provided. Further, clinical and preclinical trials along with results of the trials are also included in the report.

In addition to complete details of each product, the report provides key trends in Pre-eclampsia pipeline studies. The products under development are categorized according to their development phase, mechanism and company to provide detailed insights into the type of drugs being developed and the stages of development.
