Abstracts

Ventricular tachycardia is a type of arrhythmia, which starts in ventricles. The heart's electric system causes rapid heartbeat, leading to ventricular fibrillation that can cause sudden cardiac death. The rapid heartbeat causes inadequate time to refill prior to pumping blood. This lowers the supply of blood to the body, which causes dizziness, faintness and even cardiac arrest. It is often treated through medications or heart surgery.

To assist researchers, investors and business development managers, VPA Research has come up with a comprehensive report on Ventricular Tachycardia pipeline. The report provides insights into different therapeutic candidates in preclinical, research, discovery, NDA/IND, pre registration, phase 1, phase 2, and phase 3 trials). Drugs under development directly and through combination with other drugs are also included.

Current status, developmental phase, participating companies and entities, recent developments, orphan drug/ fast track/ other designations, drug class are provided for each Ventricular Tachycardia pipeline product. Mechanism of Action and the target area of the pipeline product are also provided. Further, clinical and preclinical trials along with results of the trials are also included in the report.

In addition to complete details of each product, the report provides key trends in Ventricular Tachycardia pipeline studies. The products under development are categorized according to their development phase, mechanism and company to provide detailed insights into the type of drugs being developed and the stages of development.

Contents

1 TABLE OF CONTENTS

1.1 List of LIST OF FIGURES

1.2 List of Tables

2 VENTRICULAR TACHYCARDIA PIPELINE ANALYSIS

2.1 Disease and Pipeline Overview

2.2 Ventricular Tachycardia Pipeline Snapshot

2.3 Ventricular Tachycardia Pipeline by Phase

2.4 Ventricular Tachycardia Pipeline by Company

2.5 Ventricular Tachycardia Pipeline by Mechanism of Action

3 VENTRICULAR TACHYCARDIA- COMPANY WISE PIPELINE ANALYSIS

Audentes Therapeutics, Inc.

Espero Biopharma, Inc

Gilead Sciences, Inc.

Ono Pharmaceutical Co., Ltd.

Elex Biotech LLC

ARMGO Pharma, Inc.

4 VENTRICULAR TACHYCARDIA R&D PIPELINE SNAPSHOTS

Drug wise Pipeline Details

Therapeutic Candidate Name

Originator

Co-Developer/ License Partner

Orphan Drug Designation

Development Phase

Mechanism of Action

Current Status

Ongoing Clinical Trial Details

5 RECENT DEVELOPMENTS IN VENTRICULAR TACHYCARDIA PIPELINE

6 APPENDIX

6.1 About VPA Research

6.2 Sources and Research Methodology
