Abstracts

The global demand for Scar treatment options is emerging rapidly driven by consumption in major emerging markets. As more growth opportunities will turn up over the medium to long term future, a large number of companies are working on Scar pipeline. Companies quickly adapting to the change and moving their products to advanced phases will evolve as top performers. However, challenges of completing clinical trials on schedules and inadequate financial support are holding some of the Scar pipeline companies from advancing their products into Phase 3 or Phase 4.

Scar Report Description

The H1 2019 pipeline review report on Scar pipeline is a comprehensive study on the candidates in development across different phases worldwide. This research study evaluates each of the pipeline products in terms of their current status, regulatory progress and expected phase completion date. Focusing on the factors driving and challenging pipeline drug development, this strategic analysis review presents detailed analysis on all active Scar pipeline compounds.

The Scar pipeline guide presents information on all active drugs currently being developed for Scar. The research work provides details of active therapeutic candidates in different phases including discovery, research, pre-clinical, phase I, Phase II, Phase III and pre-registration phases.

Details of current status, R&D progress and latest developments for every Scar pipeline

candidate are analyzed.

Further, current phase of development, mechanism of drug action, special designations such as orphan drug status, fast track designation, grants awarded, etc are presented for all Scar drug candidates.

Drug development companies, collaborators, originating companies, license providers and universities participating in the Scar product pipeline are provided. Company overview, snapshot and developments are provided for all participating companies.

The report assists in identifying potential upcoming companies and drugs in Scar pipeline market along with progress of each drug. It also enables users to formulate effective strategies to stay ahead of competition.

VPA Research has developed a robust methodology for assessing pharmaceutical drugs, market sizes and sound forecast tools. All our research reports are provided through intense and repetitive primary and secondary research methods. Further, these reports are validated with industry experts to ensure reliability in the current scenario. The report is presented in a user-friendly format and presents clear and actionable insights.

Scope of Scar pipeline report includes

- An overview of Scar disease including symptoms, causes, diagnosis and available treatment options is provided.

- Snapshot of pipeline detailing number of active compounds, mergers and acquisitions, phase wise compounds, target areas, mechanism of action, trials etc

- Phase wise count of pipeline compounds

- Company wise list of pipeline compounds

- Mechanism of Action wise pipeline compounds

For each pipeline product, the following details are provided-

Snapshot (Drug, Mechanism of Action, Phase, Co Developer, Originator,

Synonym, Orphan Drug Status, New Molecular Entity, Area)

Current status of development

Drug overview

Mechanism of Action

Pre-clinical and Clinical Trials

REASONS TO BUY

The report is designed to help industry executives promote the success and continued growth of their organizations

Get clear understanding of the entire Scar pipeline, with details on active projects

Stay ahead of the competition through comprehensive knowledge of Scar pipeline progress

Get in detail information of each product with updated information on each project along with key milestones

Gain clear insights into the market through in-depth strategic analysis review

Know the list of companies participating in global Scar pipeline along with progress of each of the company's products and information on associations/collaborations/licensing data

Get trial information for each pipeline product under development

Understand the pipeline structure in terms of mechanism of Action, phase and company

The report will be delivered in 2 working days.
