## Abstracts

The global demand for Hemophilia B treatment options is expected to report strong growth over the medium to long term future driven by consumption in major markets. Strong growth prospects of drugs for Hemophilia B are driving leading companies to invest their resources on the pipeline.

Companies quickly advancing their drug candidates to advanced phases will evolve as top performers. However, challenges of completing clinical trials on schedules and inadequate financial support are holding some of the Hemophilia B pipeline companies from advancing their products.

### Hemophilia B Report Description

The H1-2019 pipeline review report on Hemophilia B is a comprehensive study on drug candidates across different phases worldwide. This report evaluates each of the pipeline products in terms of their current status, regulatory progress and expected phase completion date.

The Hemophilia B pipeline guide presents information on all active drugs currently being developed for Hemophilia B. The research work provides details of active therapeutic candidates in different phases including discovery, research, pre-clinical, phase I, Phase II, Phase III and pre-registration phases.

Details of current status, R&D progress and latest developments for every Hemophilia B pipeline candidate are analyzed.

Further, current phase of development, mechanism of action, special designations such as orphan drug status, fast track designation, grants awarded, etc are presented for all Hemophilia B drug candidates.

Drug development companies, collaborators, originating companies, license providers and universities participating in the Hemophilia B product pipeline are provided. Company overview, snapshot and developments are provided for all participating companies.
