## Executive Summary

During the 2019 to August 2020 observation period, 1194 COVID-19 trials have been initiated and an additional 503 clinical trials are planned to commence. Of the total 1697 trials studied in the research, 726 trials are in Phase 2, 549 trials are in Phase 3, 220 trials in Phase 0 and Phase 1, and 183 trials in Phase 4. In terms of enrollment, 62% of subjects are recruited/planned for Phase 3.

Around 84% of trials are recruiting or planning to recruit subjects for their pipeline product development. Over 21% of trials are directly sponsored by pharmaceutical companies with the remaining 79% being sponsored indirectly by companies or

sponsored by institutions.

Among countries, the US stood the largest market worldwide, accounting for 441 clinical trials. Among economy types, advanced and emerging economies share an almost equal volume of trials with the former accounting for 53% of trial count.

Overall, during the period under consideration, new clinical trial count has been steadily increasing. Further, with robust market outlook, the number of clinical trials and enrolment is also expected to increase steadily through 2022.
