## **Abstracts**

The AI in Food and Beverages market is a large and high-potential growth industry. In 2023, the market is poised to register positive year-on-year growth over 2022. Further, the AI in Food and Beverages market size maintains a super-linear growth trajectory, registering continuous expansion from 2023 to 2030.

As we enter the late half of 2023, the AI in Food and Beverages industry is poised for significant growth and transformation. The “AI in Food and Beverages Market Size, Share, Trends, Growth, Outlook, and Insights Report, 2023- Data Forecasts by Type, Application, Segments, Countries, and Companies, 2018- 2030” report details the definition and advantages of AI in Food and Beverages.

### **Overview of the AI in Food and Beverages Industry in 2023**

The accelerating development of the industry is driven by a widening application base, R&D investment in new product development, competitive strategies focusing on expanding into niche segments, and potential growth prospects for AI in Food and Beverages Companies in developing countries.

The AI in Food and Beverages Insights Report provides key market size and share outlook, short-term and long-term trends, potential opportunities, analytical models, current market conditions, scenario analysis, post-COVID analysis, competitive landscape, company profiles, and market news and developments.

## AI in Food and Beverages Market Size, Share, and Trend Analysis

The global AI in Food and Beverages market plays a major role in the global electronics and semiconductors industry. The report provides a comprehensive and in-depth analysis of different segments across the industry.

Further, potential types, applications, products, and other AI in Food and Beverages segments are analyzed in the market study.

AI in Food and Beverages Market Statistics- Current status of the AI in Food and Beverages industry and the key statistics for 2023 are provided in detail.

Strategic Analysis of AI in Food and Beverages Industry- Competitive analysis, vendor landscape, SWOT profiles, and product profiles are included.

Market Trends and Insights- The AI in Food and Beverages Insights report provides a detailed examination of key market trends, drivers, and their impact on demand. Further, the increasing importance of AI in Food and Beverages across industries is discussed.

Market Developments- Mergers, acquisitions, product launches, capacity expansion plans, and other developments announced by leading AI in Food and Beverages companies are included in the study.

AI in Food and Beverages Market Opportunities- Potential growth opportunities and quantitative comparison of different segments to provide an assessment of diverse opportunities in the industry.

Regional analysis- Further, a geographical analysis of the AI in Food and Beverages industry, highlighting key markets and their growth prospects is included. The market size across six regions including North America, Asia Pacific, Europe, South America, the Middle East, and Africa is forecast to 2030.

### Analytical Frameworks

The AI in Food and Beverages insights report uses multiple analytical frameworks for analyzing the global AI in Food and Beverages industry. The tools include- Industry SWOT, Porter's Five Forces Analysis, PESTLE analysis, scenario analysis, and others.

**Industry SWOT-** The report identifies the key strengths, weaknesses, opportunities, and threats facing the global markets in 2023 and beyond.

**Scenario analysis-** 4 scenarios for the long-term future based on the global economy are analyzed.

**Porter's Five Forces Analysis-** The report quantifies Porter's five forces analysis to assess the market attractiveness using the weighted average of the Bargaining power of buyers, Bargaining power of suppliers, Threat of substitutes, Threat of new entrants, and intensity of competitive rivalry.

#### Future AI in Food and Beverages Growth Outlook and Opportunities

The chapter provides a detailed analysis of market size, growth rate, revenue trends, and volume analysis over the historical period from 2018 up to 2022. Projection of the future growth prospects and opportunities in the AI in Food and Beverages industry along with insights into each of the potential market segments is included in the study. Further, the evaluation of factors driving market growth across markets is provided. In addition, the latest technological advancements and an analysis of the impact of these advancements on the performance, reliability, and efficiency of products are included.

#### Market Dynamics- Impact Analysis and Post-COVID Outlook of AI in Food and Beverages Industry

Optimistic economic conditions are observed in H2-2023 across multiple scenarios. The current edition of the AI in Food and Beverages Market Study identifies brighter views for 2023 and an increasingly optimistic global outlook over the forecast period.

However, the market is also constrained by challenges of geopolitical instability and conflicts with the Russia-Ukraine war and inflation conditions in the US and other markets, and rising interest rates continue to restrain the market growth prospects.

The four case scenarios considered for countries in the study are -

Sluggish economic growth, with emphasis on savings and low expenditure

Despite growth fluctuations, consumer confidence remains robust and gains continue for companies

Investments in technology deployment and productive investments

Stronger consumer demand and higher investments supporting solid growth

AI in Food and Beverages Market Trends- Emerging markets present strong growth prospects

According to the World Bank, over 85% of the world's population lives in the Asia Pacific, the Middle East and Africa (MEA), or South America. An increasing volume of companies are expanding their production and marketing bases to these countries as the consumption power of individuals continues to strengthen.

Several new market entrants are targeting niche economically attractive AI in Food and Beverages segments when expanding into these markets. We anticipate the AI in Food and Beverages sales growth in developing countries to continue to accelerate rapidly over the forecast period.
