## Abstracts

The global Angina Pectoris Drugs market size is poised to register 5.8% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Angina Pectoris Drugs market across By Therapeutic Class (Beta Blockers, Calcium Channel Blockers, Nitrates, Angiotensin-converting Enzyme Inhibitors (ACE Inhibitors), Anti-Platelets, Others).

The Angina Pectoris Drugs Market is characterized by advancements in pharmacotherapy, interventional cardiology, and preventive cardiology aimed at reducing the burden of angina symptoms and improving cardiovascular outcomes. Angina pectoris, a common manifestation of coronary artery disease, is characterized by chest pain or discomfort due to myocardial ischemia. Key trends include the development of antianginal medications, vasodilators, and antiplatelet agents to alleviate angina symptoms, improve exercise tolerance, and prevent cardiovascular events. Additionally, there is a growing emphasis on lifestyle modifications, risk factor management, and patient education to optimize secondary prevention strategies and reduce the progression of coronary artery disease. Moreover, advancements in noninvasive diagnostic testing, cardiac imaging modalities, and coronary revascularization techniques are facilitating early detection, risk stratification, and personalized treatment planning for patients with angina pectoris, ultimately improving quality of life and reducing morbidity and mortality associated with ischemic heart

disease.
