## **Abstracts**

The global Angio Suites market size is poised to register 6.18% growth (CAGR) from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Angio Suites market By Type (Biplane Angio Suites, Single Plane Angio Suites), By Application (Angioplasty, Therapeutic Stenting, Angiograms, Obstruction Bypass, Others).

The future of angio suites is shaped by advancements in imaging technology, procedural workflow, and interventional techniques that offer more efficient and precise diagnosis and treatment of cardiovascular and neurovascular diseases. Key trends include the integration of high-resolution flat-panel detectors and cone-beam computed tomography (CBCT) imaging for real-time visualization and navigation during minimally invasive procedures, development of robotic-assisted and remote-controlled angiography systems for enhanced procedural precision and operator safety, and customization of suite layouts and equipment configurations to accommodate multidisciplinary interventions and hybrid surgical procedures. These advancements enable more accurate and comprehensive diagnosis and treatment of complex vascular conditions, improving patient outcomes and reducing healthcare costs..
