Abstracts

The global Anti infective Drugs market size is poised to register 3.3% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Anti infective Drugs market across By Product (Antibiotics, Antivirals, Antifungals, Others), By Indication (HIV Infection, Pneumonia, Respiratory Virus Infection, Sepsis, Tuberculosis, Others), By Distribution Channel (Hospital Pharmacy, Retail Pharmacy, Others)

With the increasing prevalence of infectious diseases and the ongoing threat of emerging pathogens and antimicrobial resistance, there is a rising need for anti-infective agents that offer broad-spectrum activity, novel mechanisms of action, and improved pharmacokinetic properties to combat microbial infections. Market growth is driven by factors such as expanding global travel and urbanization, the rising incidence of healthcare-associated infections and community-acquired illnesses, and technological advancements in drug discovery and molecular diagnostics. Additionally, the expanding applications of anti-infective drugs in hospitals, clinics, and public health settings, as well as the growing adoption of combination therapy and antimicrobial stewardship programs, contribute to market expansion. Further, the development of next-generation antibiotics and antivirals targeting drug-resistant pathogens, the integration of rapid diagnostic tests and point-of-care assays for infectious disease detection, and the

emphasis on infection prevention and control strategies are expected to further propel market growth in the coming years.
