Abstracts

The global Antihypertensive Drugs market size is poised to register 3.54% growth (CAGR) from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Antihypertensive Drugs market By Drug Class (Diuretics, ACE Inhibitors, Calcium Channel Blockers, Beta-adrenergic Blockers, Vasodilators, Others), By Type (Primary Hypertension, Secondary Hypertension), By Route of Administration (Oral, Injectables, Others), By Distribution Channel (Retail Pharmacy, Hospital Pharmacy, Online Pharmacy).

The future of antihypertensive drugs is characterized by personalized medicine approaches, novel drug targets, and combination therapies aimed at improving blood pressure control and reducing cardiovascular risk in hypertensive patients. Key trends include the development of new classes of antihypertensive agents targeting renin-angiotensin-aldosterone system (RAAS), sympathetic nervous system, and endothelin pathways, integration of pharmacogenetic testing and biomarker-based risk stratification to guide treatment selection and dosing, and customization of treatment regimens combining multiple antihypertensive drugs with complementary mechanisms of action to

achieve target blood pressure goals. These advancements offer new treatment options for individuals with resistant hypertension or comorbid conditions, improving cardiovascular outcomes and quality of life for patients with high blood pressure..
