Abstracts

The global Antithrombin market size is poised to register 4.9% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Antithrombin market across By Usage (Therapeutics, Diagnostics, Research, Other), By Source (Human, Recombinant Goat Milk, Others), By Type (Anticoagulant, Antiplatelet, Thrombolytic Drugs), By Route of Administration (Oral, Parenteral)

With the increasing incidence of thromboembolic disorders such as deep vein thrombosis (DVT), pulmonary embolism (PE), and disseminated intravascular coagulation (DIC), there is a rising need for antithrombin medications that inhibit blood clot formation and reduce the risk of thrombotic events. Market growth is driven by factors such as expanding aging population, the rising prevalence of cardiovascular risk factors and comorbidities, and technological advancements in anticoagulant therapy and monitoring. Additionally, the expanding applications of antithrombin in hospital settings, intensive care units, and surgical procedures, as well as the growing adoption of prophylactic anticoagulation and extended thromboprophylaxis regimens, contribute to market expansion. Further, the development of novel antithrombin agents with enhanced specificity and bioavailability, the integration of point-of-care testing and personalized dosing algorithms, and the emphasis on thrombosis prevention and patient

safety are expected to further accelerate market growth in the coming years.

Antithrombin Market Drivers, Trends, Opportunities, and Growth Opportunities
