Abstracts

The global Atherosclerosis Drugs market size is poised to register 3.1% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Atherosclerosis Drugs market across By Drug (Anti-platelet and Anticoagulants, Cholesterol Lowering Medication, ACE Inhibitors, Others), By Route of Administration (Oral, Injectable), By Distribution Channel (Hospital Pharmacies, Online, Drug Stores, Others)

With the increasing prevalence of cardiovascular diseases such as coronary artery disease (CAD) and peripheral artery disease (PAD), there is a rising demand for anti-atherosclerotic medications that reduce plaque buildup and lower the risk of cardiovascular events in high-risk patients. Market growth is driven by factors such as expanding aging population, the rising incidence of metabolic risk factors such as obesity and diabetes, and technological advancements in lipid-lowering therapies and anti-inflammatory agents. Additionally, the expanding applications of atherosclerosis drugs in cardiology practices and preventive medicine, as well as the growing adoption of combination statin and PCSK9 inhibitor therapies for aggressive lipid management, contribute to market expansion. Further, the development of novel drug classes targeting atherosclerotic pathways and vascular inflammation, the integration of precision medicine approaches and genetic testing for risk stratification, and the

emphasis on lifestyle modifications and cardiovascular risk reduction strategies are expected to further accelerate market growth in the coming years.
