Abstracts

The global Blood Bank market size is poised to register 5.1% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Blood Bank market across By Product (Whole Blood, Red Blood Cells, Platelet, Plasma, White Blood Cells), By Function (Collection, Processing, Testing, Storage, Transportation), By Bank (Private, Public), By End-User (Hospital, Ambulatory Surgery Centers, Pharmaceutical Companies, Clinics, Others)

With the increasing demand for safe and adequate blood supplies to support medical emergencies, surgeries, and transfusion-dependent patients, there is a growing need for efficient blood collection, processing, and storage facilities. Market growth is driven by factors such as expanding healthcare infrastructure, advancements in blood screening and testing technologies, and the rising awareness of blood donation and voluntary blood drives. Additionally, the expanding applications of blood bank services in trauma centers, hospitals, and emergency response units, as well as the adoption of quality management systems and cold chain logistics, contribute to market expansion. Further, the emphasis on blood safety, inventory management, and donor recruitment strategies, along with efforts to address blood shortages and transfusion-transmitted

infections, is expected to further propel market growth in the coming years.
