Abstracts

The global Blood Warmer market size is poised to register 8.77% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Blood Warmer market across By Product (Portable, Non-portable), By Application (Surgery, Acute Care, New Born Care, Homecare, Others), By End-User (Hospitals/Clinic, Ambulatory Services, Defense Forces, Rescue Forces).

The blood warmer market is experiencing significant growth due to increasing demand for intraoperative patient warming solutions, rising adoption of blood transfusion therapy in surgical procedures, and advancements in blood warming technologies. Blood warmers are medical devices used to raise the temperature of blood products, intravenous fluids, and irrigation fluids to body temperature before administration to patients, preventing hypothermia and improving patient outcomes during surgery and trauma resuscitation. With a focus on perioperative care and patient safety, operating rooms, emergency departments, and critical care units are integrating blood warming systems into clinical practice to maintain normothermia, minimize perioperative complications, and enhance patient comfort and recovery following surgical interventions and traumatic injuries.
