## **Abstracts**

The global Chronic Kidney Disease market size is poised to register 6.2% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Chronic Kidney Disease market across By Diagnosis (Blood Tests, Urine Tests, Imaging Tests, Others), By Treatment (Drug Class, Dialysis, Others), By End-User (Hospital, Diagnostic Laboratories, Others)

With the increasing prevalence of CKD and the growing burden of end-stage renal disease (ESRD) and related complications, there is a rising demand for CKD management strategies that delay disease progression, reduce cardiovascular risk, and improve patient outcomes. Market growth is driven by factors such as expanding aging population, rising incidence of diabetes and hypertension, and advancements in nephrology diagnostics and therapeutics. Additionally, the expanding applications of CKD biomarkers, renal imaging modalities, and multidisciplinary care models, as well as the development of novel pharmacotherapies and renal replacement therapies, contribute to market expansion. Further, the emphasis on early detection, patient education, and lifestyle modifications, along with efforts to optimize medication management and dialysis access, is expected to further propel market growth in the coming years.
