Abstracts

The global Civil Engineering market size is poised to register rapid growth from 2024 to 2030 as compared to CAGR between 2018 and 2023. The market size outlook is spurred by investments in capitalizing untapped potential and future possibilities. Our analysts foresee a boom in niche market segments driven by surging demand in key regions.

This comprehensive study discusses the latest trends and the most pressing challenges for industry players and investors. The Civil Engineering market research analyses the global market trends, key drivers, challenges, and opportunities in the industry. In addition, the latest Future of Civil Engineering survey report provides the market size outlook across types, applications, and other segments across the world and regions. It provides data-driven insights and actionable recommendations for companies in the Civil Engineering industry.

Key strategies adopted by companies within the Civil Engineering industry

With growth, margin, and sustainability remaining the three main focus areas of leading companies, the report helps understand the key strategies of Civil Engineering companies. Companies successfully navigating the supply chain disruptions and building resilient networks are better positioned to meet customer needs in 2024 and beyond. An estimated 70% of the Civil Engineering companies are focusing on supply chain optimization to address raw material costs, energy, transportation costs, production efficiency, and profitability. Further, companies are leveraging advanced technologies to unlock opportunities and achieve operational excellence. The report provides key strategies opted for by the top 10 Civil Engineering companies.

Key trends defining the global Civil Engineering market in 2024 and Beyond

The industry continues to remain an attractive hub for opportunities for both domestic and multinational manufacturers. As the market is evolving, factors such as emerging market dynamics, demand from end-user sectors, a growing domestic customer base, changes in consumption patterns, and widening distribution channels continue to play a major role. Further, the Russia-Ukraine war, recession impact, inflation, slowing demand in a few consumer groups, and other macroeconomic factors shape the market growth prospects.

Civil Engineering Market Segmentation

The Civil Engineering industry comprises a wide range of segments and sub-segments. The rising demand for these product types and applications is supporting companies to increase their investment levels across niche segments. Accordingly, leading companies plan to generate a large share of their future revenue growth from expansion into these niche segments. The report presents the market size outlook across segments to support Civil Engineering companies scaling up production in these sub-segments with a focus on expanding into emerging countries.

Delve Deeper with Comprehensive Qualitative Analysis

The Civil Engineering market research report dives deep into the qualitative factors shaping the market, empowering you to make informed decisions-

Industry Dynamics: Porter's Five Forces analysis to understand bargaining power, competitive rivalry, and threats that impact long-term strategy formulation.

Strategic Insights: Provides valuable perspectives on key players and their approaches based on comprehensive strategy analysis.

Internal Strengths and Weaknesses: Develop targeted strategies to leverage strengths, address weaknesses, and capitalize on market opportunities.

Future Possibilities: Prepare for diverse outcomes with in-depth scenario analysis. Explore potential market disruptions, technology advancements, and economic changes.

Civil Engineering Country Analysis and Outlook to 2030

The report analyses 22 countries worldwide including the key driving forces and market size outlook from 2018 to 2030. In addition, region analysis across Asia Pacific, Europe, the Middle East, Africa, North America, and South America is included in the study. For each of the six regions, the market size outlook by segments is forecast for 2030.

United States Civil Engineering Market Size Outlook- Companies plan for focused investments in a changing environment

The US continues to remain the market leader in North America, driven by a large consumer base, the presence of capital-intensive manufacturers and vendors, and a strong end-user industry demand. Leading companies are focusing on upgrading their plants in synchronization with the changing environment. The US economy is expected to grow in 2024 (around 2.2% growth in 2024), potentially driving demand for various Civil Engineering market segments.

Canada Civil Engineering Market Size Outlook-- Rise in demand in different end-user industries

The Purchasing Managers' Indices (PMI) in Canada is above 50, suggesting strong growth prospects in the industrial segment. The country's GDP forecast according to the Bank of Canada stood at 2.1% growth in 2024. Strong end-user demand is encouraging Canadian Civil Engineering companies to invest in niche segments. Further, in addition to domestic demand, strong trade prospects encourage the market size outlook.

Mexico Civil Engineering Market Size Outlook- Well positioned to expand its global market share

The OECD expects GDP to register a 1.6% growth in 2024, driven by Mexico's ambitious set of reforms planned by the government. Mexico Civil Engineering market presents promising growth prospects and also gains from its strategic location for reaching the American markets. Rapid urbanization, and growing consumer demand, As Mexico continues to strengthen its trade relations and invest in technological advancements, the Civil Engineering market is expected to experience significant expansion, offering lucrative opportunities for both domestic and international

stakeholders.

Germany Civil Engineering Market Size Outlook-Companies investing in assessing consumers, categories, competitors, and capabilities

The German industry has a resilient track record and is adapting to evolving market dynamics. Following post-pandemic disruptions, the German Civil Engineering market is expected to rebound in 2024. Germany's GDP is forecast at 0.9% in 2024 according to the IMF World Economic Outlook. In addition, the growing demand for eco-friendly solutions presents significant opportunities for companies embracing sustainable practices.

France Civil Engineering Market Size Outlook- consumer sentiment is forecast to relatively steady throughout 2024

France is set to register the strongest growth rate in Civil Engineering industry in Europe, owing to sustained economic recovery, government initiatives, and a steady job market. The IMF World Economic Outlook estimates France to register 1.3% GDP growth in 2024. Civil Engineering consumers in France are anticipated to maintain a consistent level of confidence throughout the year, driving the overall market prospects. Accordingly, companies are increasingly focusing their attention on long-term growth opportunities.

United Kingdom Civil Engineering Market Size Outlook- Brands continue to perform well and companies likely to gain market share

The UK's Civil Engineering market is set for a positive outlook in 2024, marked by the continued success of established brands and opportunities for companies to capture market share. In the United Kingdom's Civil Engineering market, brands are demonstrating resilience and a positive trajectory, contributing to a favorable market size outlook. Companies operating in this sector are poised to gain market share as a result of robust brand performance. This success can be attributed to factors such as effective marketing strategies, innovative product offerings, and a keen understanding of consumer preferences

Spain Civil Engineering Market Size Outlook- New growth opportunities in the industry

The Spanish Civil Engineering market is poised for exciting growth in 2024, presenting a wealth of opportunities for forward-thinking businesses. New avenues for Civil

Engineering market expansion are rapidly emerging, fueled by rising consumer demand, technological advancements, shifting regulations, and untapped market segments. Overall, the proactive approach of businesses in identifying and leveraging new growth prospects positions Spain's Civil Engineering market for an upward trajectory, fostering both domestic and international interest.

Italy Civil Engineering Market Size Outlook- strong process engineering capabilities, low-cost manufacturing capabilities, and abundant manpower

Italy's Civil Engineering market holds a robust outlook, driven by its strong process engineering capabilities, low-cost manufacturing capabilities, and an abundant pool of skilled manpower. Overall, Italy's Civil Engineering market is expected to witness an expansion in its market size, offering a compelling landscape for both domestic and international players to thrive.

China Civil Engineering Market Size Outlook- an attractive hub for opportunities for both domestic and multinational manufacturers

China's Civil Engineering market presents a compelling outlook in 2024, acting as a magnet for both domestic and multinational manufacturers seeking growth opportunities. The market size is anticipated to register the second-fastest growth in the region. The country's continuous investment in technological advancements, coupled with a robust supply chain, further enhances the market prospects. Our report utilizes in-depth interviews with industry experts and comprehensive data analysis to provide a comprehensive outlook.

India Civil Engineering Market Size Outlook- The Economy is steadily evolving towards being more consumption-driven

The increasing disposable income, coupled with changing lifestyles and preferences, contributes to a growing demand for Civil Engineering products and services. With a burgeoning population and a rising middle class, India offers a vast consumer market. Rapid urbanization and evolving lifestyles create avenues for new consumption patterns and preferences within the Civil Engineering market. Amidst increasing consumer demand for diverse Civil Engineering segments, tailoring products and services to regional preferences and individual needs will resonate with diverse consumer segments.

Japan Civil Engineering Market Size Outlook- Plans for growth in a changing

environment

Japan's Civil Engineering market exhibits a forward-looking perspective with strategic plans for growth in a changing environment. Faced with shifting economic dynamics and evolving consumer preferences, businesses in the sector are adapting to seize emerging opportunities. Companies are aligning their strategies to navigate changes, explore new markets, and enhance their competitive edge.

South Korea Civil Engineering Market Size Outlook- companies are launching a series of new initiatives and category expansions

Introducing fresh products and exploring new segments to cater to diverse consumer choices propels South Korea Civil Engineering market growth. In particular, brands are venturing into new segments within the Civil Engineering market, offering diverse choices and attracting new customer bases. The report provides the Korean Civil Engineering market size outlook to 2030 and the key factors driving the market outlook.

Brazil Civil Engineering Market Size Outlook- Continued urbanization and rising income levels

Rising income levels contribute to greater purchasing power among consumers, spurring consumption and creating opportunities for market expansion. Continued urbanization and rising income levels are expected to sustainably drive consumption growth in the medium to long term. Despite being above the Central Bank's target, inflation is projected to decline gradually throughout 2024.

Middle East Civil Engineering Market Size Outlook- continues its upward trajectory across segments

Robust demand from Middle Eastern countries including Saudi Arabia, the UAE, Qatar, Kuwait, and other GCC countries supports the overall Middle East Civil Engineering market potential. Fueled by economic diversification efforts, infrastructural development, and a growing population, the region is witnessing increased demand for Civil Engineering products and services.

Africa Civil Engineering Market Size Outlook- Shifting toward global specialties

Africa's GDP is expected to grow at an average of 4% annually over the next decade, fueled by urbanization, a rising middle class, and increased investment in infrastructure

and manufacturing. Africa's population is expected to reach 2.5 billion by 2050, making it the world's most populous continent. Strong demand growth across application segments drives the Africa Civil Engineering market outlook to 2030.

Civil Engineering Market Company Profiles

The global Civil Engineering market is characterized by intense competitive conditions with leading companies opting for aggressive marketing to gain market shares. The report presents business descriptions, SWOT analysis, growth strategies, and financial profiles.
