Abstracts

The global Concussion market size is poised to register 3.9% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Concussion market across By Assessment and Treatment (Diagnosis (Magnetic Resonance Imaging (MRI) Devices, Computed Tomography (CT) Scan, X-ray), Treatment), By End-User (Hospital & Clinics, Diagnostic Centers, Others).

The concussion market is experiencing significant growth due to increasing awareness of sports-related head injuries, rising incidence of traumatic brain injuries (TBIs), and expanding research on concussion diagnosis, management, and rehabilitation strategies. Concussion, also known as mild traumatic brain injury (mTBI), is a common neurological condition characterized by temporary loss of brain function following head trauma or impact, leading to symptoms such as headache, dizziness, memory loss, and cognitive impairment. With a focus on athlete safety and concussion management, sports medicine physicians, neurologists, and rehabilitation specialists are employing multimodal assessment tools, cognitive tests, and neuroimaging techniques to evaluate concussive injuries, implement personalized treatment plans, and monitor recovery progress in athletes, soldiers, and individuals at risk for brain injury, driving advancements in concussion care and sports concussion protocols in sports medicine

and neurology practice.
