Abstracts

The global Constipation Treatment market size is poised to register 5.1% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Constipation Treatment market across By Therapeutics (Laxatives, Chloride Channel Activators, Peripherally Acting Mu-Opioid Receptor Antagonists, GC-C Agonists, Others), By Disease (Chronic idiopathic constipation (CIC), Irritable bowel syndrome with constipation (IBS-C), Opioid-induced constipation (OIC)), By Distribution Channel (Hospital Pharmacies, Retail Pharmacies, Online Pharmacies)

With the increasing prevalence of chronic constipation and functional bowel disorders and the growing recognition of the multifactorial nature of gastrointestinal motility disorders, there is a rising demand for constipation treatments that provide symptomatic relief, improve bowel function, and address underlying pathophysiological mechanisms. Market growth is driven by factors such as expanding aging population, rising incidence

of lifestyle-related constipation risk factors and comorbidities, and advancements in gut-brain axis research and neurogastroenterology. Additionally, the expanding applications of laxatives, prokinetic agents, and dietary fiber supplements, as well as the development of novel pharmacotherapies and medical devices for colonic transit evaluation and pelvic floor rehabilitation, contribute to market expansion. Further, the emphasis on patient-centered care, personalized treatment algorithms, and multidisciplinary approach to bowel management, along with efforts to raise awareness of constipation symptoms and treatment options among healthcare providers and patients, is expected to further propel market growth in the coming years.
