2020 Contact Dermatitis PIPELINE HIGHLIGHTS

Contact Dermatitis is one of the widely researched conditions during 2020 with 5 companies actively focusing on realizing pipeline's potential. Development of Contact Dermatitis medicines is identified as integral to the strategy of the majority of companies operating in the industry.

Global Contact Dermatitis market presents promising new product pipeline with NME Projects, pivotal trials, and rapidly phase-advancing therapeutic candidates. Increasing number of companies are assessing the feasibility of developing treatment options for Contact Dermatitis.

Good progress is anticipated during 2020 and 2021 with Contact Dermatitis pipeline molecules advancing from pre-clinical investigation to completion of advanced Phase clinical trials. Contact Dermatitis pipeline continues to expand and progress with novel mechanisms and diverse routes of administration being tested by companies.

Contact Dermatitis DRUG DEVELOPMENT PIPELINE OVERVIEW

The "Contact Dermatitis pipeline Research Monitor, 2020" report is an analytical research study on the progress achieved by pipeline companies during the year along with its historical development, current status, and outlook.

This Contact Dermatitis pipeline review explores high-potential early to late-stage pipeline projects with a continued focus on new insights, accelerated processes, and pipeline progression.

The competitive intelligence report on Contact Dermatitis presents detailed insights into therapeutic drug pipeline development, industry news, deals, and analysis across the length and breadth of the Contact Dermatitis pipeline. Information on R&D pipeline

updates, results of key clinical trials are also included in the report.

Contact Dermatitis DRUG PROFILES

Contact Dermatitis development pipeline including projects in early- and late-stage development are detailed in the report. Details of clinical trial data and submissions to regulatory authorities are also provided. For the drug candidates included in the report, the following information is provided-

Current Status of Development including phase advancements, regulatory approvals of phases, acquisitions, licensing and technology transfers, product launches in various markets, and others.

Phase of development

Mechanism of Action

Route of Administration

Companies involved including originator, licensing companies, developer, investors, and others

New molecular entity details

Orphan drug designation and other special status provided by regulators

Contact Dermatitis COMPANY PROFILES

Both small size and large size pharmaceutical companies are investing their resources in Contact Dermatitis drug development operations. Further, financial institutions are extending support to small pharmaceutical companies, universities, and other researchers for the development of treatment of Contact Dermatitis. Partnerships and acquisitions are also increasingly observed in the pipeline.

This research report presents an analysis of 5 Contact Dermatitis companies including company overview, key snapshot, contact information, and their strategies on accelerating Contact Dermatitis pipeline development. Mid-stage and early portfolios of these companies are analyzed in detail in the report.

Companies analyzed in the report include- Brickell Biotech Inc, Edesa Biotech Inc,

Hapten Sciences Inc, ILiAD Biotechnologies LLC, Signum Dermalogix Inc

REASONS TO BUY

The current market conditions are forcing companies and investors worldwide to prioritize their investments and accelerate pipeline candidates only through careful quantitative assessment.

This research work assists decision makers in pharmaceutical companies towards successful pipeline development through critically evaluated pipeline data

Buyers can identify most promising drug candidates for treatment of Contact Dermatitis

It allows users to strengthen their pipeline through acquisitions, licensing and collaborations

Users can estimate possible delays in the delivery of pipeline or launch of new products

Stay ahead of competition through understanding their pipeline progression, strategies and outlook

The report details all the pipeline candidates under investigation in various stages of development from Phase I through to Phase III to enable business development managers to understand the impact of new launches.

Optimize your licensing and technology transfer strategies through identification of prospect partners

Contents

1. INTRODUCTION TO CONTACT DERMATITIS

- 1.1 Contact Dermatitis- Disease overview
- 1.2 Contact Dermatitis- Market Size
- 1.3 Contact Dermatitis- Companies Involved

2. CONTACT DERMATITIS PIPELINE SNAPSHOT- 2020

- 2.1 Contact Dermatitis Pipeline by Phase
- 2.2 Contact Dermatitis Pipeline by Mechanism of Action
- 2.3 Contact Dermatitis Pipeline by Route of Administration
- 2.4 Contact Dermatitis Pipeline- New Molecular Entities
- 2.5 Contact Dermatitis Pipeline- Orphan Drug Designation/ Special Designation

3. CONTACT DERMATITIS DRUG PROFILES

- 3.1 Current Status
- 3.2 Contact Dermatitis Drug Snapshot
- 3.3 Contact Dermatitis Therapeutic Candidates- Originator/Licensors
- 3.4 Route of Administration
- 3.5 Mechanism of Action
- 3.6 NME
- 4.1 Brickell Biotech Inc Contact Dermatitis Pipeline Insights and Clinical Trials
- 4.2 Edesa Biotech Inc Contact Dermatitis Pipeline Insights and Clinical Trials
- 4.3 Hapten Sciences Inc Contact Dermatitis Pipeline Insights and Clinical Trials
- 4.4 ILiAD Biotechnologies LLC Contact Dermatitis Pipeline Insights and Clinical Trials
- 4.5 Signum Dermalogix Inc Contact Dermatitis Pipeline Insights and Clinical Trials

5. CONTACT DERMATITIS MARKET NEWS AND UPDATES

6. APPENDIX

- 6.1 Sources and Methodology
- 6.2 Contact Information
