Abstracts

The 2021 updated COVID-19 report identifies 650 companies developing therapeutic and vaccination drug candidates. Of these, 75 drug/vaccine candidates are identified in Phase 3 while 131 candidates are in Phase 2. 55 candidates are in Phase 1 and 235 candidates are in preclinical study phase. The early development COVID-19 product pipeline is much stronger with companies investing their R&D resources in preclinical COVID, 140 companies developing Research phase products.

The study is a comprehensive pipeline report analyzing potential COVID-19 pipeline products and details of companies, drug and vaccine candidates, current status, historical developments and other progress. The 2020 COVID-19 pipeline report presents a comprehensive overview of the research and development of COVID-19 drug candidates. It presents drugs in development that could potentially reach the market in the next 5 to 10 years.

As of February 2021, the COVID-19 pipeline remains robust with 650+ therapeutic candidates under development. An increasing number of companies are actively participating in the development of COVID-19 treatment.

The report provides complete details of pipeline drugs including the development phase, mechanism of action, companies involved, clinical trial developments, molecule type, and other details. Further, the report also provides COVID-19 drug development history, latest news, and other developments.

It assists companies, governments, investors and research organizations to understand the current status in 2020 and possible development in the next 10 years. Further, it enables readers to track new companies in the market and their developments. The

product portfolio of different companies and their growth strategies are also detailed in the report.

The publisher's online databases analyze pipeline drugs and developments for over 2,000 diseases worldwide. All our reports and databases are developed through intensive primary and secondary research methods. The insights and data presented in the databases are validated through industry experts and represent completely unbiased opinions.

Scope:

The report scope comprises of both pre-clinical phase and clinical phase development drugs for COVID-19 development

COVID-19 pipeline compounds and molecules under study by both large scale and small companies are included in the report

COVID-19 pipeline across different phases including discovery, research, and pre-clinical stage, phase 1, phase 2, phase 3 and pre-registration phases are covered

Drug profile comprising of current development status, regulatory progress, companies, sponsors, mechanism of action, route of administration, molecule, and discovery details are covered

Further, fast track designation, different grants awarded and special status for COVID-19 pipeline candidates included

Business overview and snapshot of all companies involved in COVID-19 pipeline are included

Latest market and pipeline developments are provided in the report
