## **Abstracts**

The global Deep Brain Stimulation in Parkinson's Disease market size is poised to register 10.92% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Deep Brain Stimulation in Parkinson's Disease market across By Product (Single Channel, Dual Channel), By End-User (Hospitals, Neurology Clinics, Ambulatory Surgical Centers, Research Centers).

The deep brain stimulation (DBS) in Parkinson's disease market is projected to see notable growth, driven by the increasing prevalence of Parkinson's disease, growing demand for advanced neuromodulation therapies, and expanding indications for deep brain stimulation. With a focus on improving motor symptoms, reducing medication-related side effects, and enhancing quality of life for patients, neurologists and neurosurgeons are increasingly recommending deep brain stimulation as a treatment option for Parkinson's disease. Additionally, advancements in DBS technology, electrode design, and surgical techniques are driving market expansion as healthcare providers seek to optimize patient outcomes, personalize treatment approaches, and improve long-term therapeutic efficacy in the management of Parkinson's disease.

Deep Brain Stimulation in Parkinson's Disease Market Drivers, Trends, Opportunities, and Growth Opportunities

This comprehensive study discusses the latest trends and the most pressing challenges for industry players and investors. The Deep Brain Stimulation in Parkinson's Disease market research analyses the global market trends, key drivers, challenges, and opportunities in the industry. In addition, the latest Future of Deep Brain Stimulation in Parkinson's Disease survey report provides the market size outlook across types, applications, and other segments across the world and regions. It provides data-driven insights and actionable recommendations for companies in the Deep Brain Stimulation in Parkinson's Disease industry.

Key market trends defining the global Deep Brain Stimulation in Parkinson's Disease demand in 2024 and Beyond

The industry continues to remain an attractive hub for opportunities for both domestic and global vendors. As the market evolves, factors such as emerging market dynamics, demand from end-user sectors, a growing patient base, changes in consumption patterns, and widening distribution channels continue to play a major role.

Deep Brain Stimulation in Parkinson's Disease Market Segmentation- Industry Share, Market Size, and Outlook to 2030

The Deep Brain Stimulation in Parkinson's Disease industry comprises a wide range of segments and sub-segments. The rising demand for these product types and applications is supporting companies to increase their investment levels across niche segments. Accordingly, leading companies plan to generate a large share of their future revenue growth from expansion into these niche segments. The report presents the market size outlook across segments to support Deep Brain Stimulation in Parkinson's Disease companies scaling up production in these sub-segments with a focus on expanding into emerging countries.

Key strategies adopted by companies within the Deep Brain Stimulation in Parkinson's Disease industry

Leading Deep Brain Stimulation in Parkinson's Disease companies are boosting investments to capitalize on untapped potential and future possibilities across niche market segments and surging demand conditions in key regions. Further, companies are leveraging advanced technologies to unlock opportunities and achieve operational excellence. The report provides key strategies opted for by the top 10 Deep Brain Stimulation in Parkinson's Disease companies.

## Deep Brain Stimulation in Parkinson's Disease Market Study- Strategic Analysis Review

The Deep Brain Stimulation in Parkinson's Disease market research report dives deep into the qualitative factors shaping the market, empowering you to make informed decisions-

**Industry Dynamics:** Porter's Five Forces analysis to understand bargaining power, competitive rivalry, and threats that impact long-term strategy formulation.

**Strategic Insights:** Provides valuable perspectives on key players and their approaches based on comprehensive strategy analysis.

**Internal Strengths and Weaknesses:** Develop targeted strategies to leverage strengths, address weaknesses, and capitalize on market opportunities.

**Future Possibilities:** Prepare for diverse outcomes with in-depth scenario analysis. Explore potential market disruptions, technology advancements, and economic changes.

## Deep Brain Stimulation in Parkinson's Disease Market Size Outlook- Historic and Forecast Revenue in Three Cases

The Deep Brain Stimulation in Parkinson's Disease industry report provides a detailed analysis and outlook of revenue generated by companies from 2018 to 2023. Further, with actual data for 2023, the report forecasts the market size outlook from 2024 to 2030 in three case scenarios- low case, reference case, and high case scenarios.

## Deep Brain Stimulation in Parkinson's Disease Country Analysis and Revenue Outlook to 2030

The report analyses 22 countries worldwide including the key driving forces and market size outlook from 2021 to 2030. In addition, region analysis across Asia Pacific, Europe, the Middle East, Africa, North America, and South America is included in the study. For each of the six regions, the market size outlook by segments is forecast for 2030.

## North America Deep Brain Stimulation in Parkinson's Disease Market Size Outlook-

## Companies plan for focused investments in a changing environment

The US continues to remain the market leader in North America, driven by a large consumer base, the presence of well-established providers, and a strong end-user industry demand. Leading companies focus on new product launches in the changing environment. The US economy is expected to grow in 2024 (around 2.2% growth in 2024), potentially driving demand for various Deep Brain Stimulation in Parkinson's Disease market segments. Similarly, Strong end-user demand is encouraging Canadian Deep Brain Stimulation in Parkinson's Disease companies to invest in niche segments. Further, as Mexico continues to strengthen its trade relations and invest in technological advancements, the Mexico Deep Brain Stimulation in Parkinson's Disease market is expected to experience significant expansion, offering lucrative opportunities for both domestic and international stakeholders.

## Europe Deep Brain Stimulation in Parkinson's Disease Market Size Outlook-Companies investing in assessing consumers, categories, competitors, and capabilities

The German industry remains the major market for companies in the European Deep Brain Stimulation in Parkinson's Disease industry with consumers in Germany, France, the UK, Spain, Italy, and others anticipated to register a steady demand throughout the forecast period, driving the overall market prospects. In addition, the proactive approach of businesses in identifying and leveraging new growth prospects positions the European Deep Brain Stimulation in Parkinson's Disease market for an upward trajectory, fostering both domestic and international interest. Leading brands operating in the industry are emphasizing effective marketing strategies, innovative product offerings, and a keen understanding of consumer preferences.

## Asia Pacific Deep Brain Stimulation in Parkinson's Disease Market Size Outlook- an attractive hub for opportunities for both local and global companies

The increasing prevalence of indications, robust healthcare expenditure, and increasing investments in healthcare infrastructure drive the demand for Deep Brain Stimulation in Parkinson's Disease in Asia Pacific. In particular, China, India, and South East Asian Deep Brain Stimulation in Parkinson's Disease markets present a compelling outlook for 2030, acting as a magnet for both domestic and multinational manufacturers seeking growth opportunities. Similarly, with a burgeoning population and a rising middle class, India offers a vast consumer market. Japanese and Korean companies are quickly aligning their strategies to navigate changes, explore new markets, and enhance their competitive edge. Our report utilizes in-depth interviews with industry experts and

comprehensive data analysis to provide a comprehensive outlook of 6 major markets in the region.

### Latin America Deep Brain Stimulation in Parkinson's Disease Market Size Outlook- Continued urbanization and rising income levels

Rising income levels contribute to greater purchasing power among consumers, spurring consumption and creating opportunities for market expansion. Continued urbanization and rising income levels are expected to sustainably drive consumption growth in the medium to long term.

### Middle East and Africa Deep Brain Stimulation in Parkinson's Disease Market Size Outlook- continues its upward trajectory across segments

Robust demand from Middle Eastern countries including Saudi Arabia, the UAE, Qatar, Kuwait, and other GCC countries supports the overall Middle East Deep Brain Stimulation in Parkinson's Disease market potential. Fueled by increasing healthcare expenditure of individuals, growing population, and high prevalence across a few markets drives the demand for Deep Brain Stimulation in Parkinson's Disease.

### Deep Brain Stimulation in Parkinson's Disease Market Company Profiles

The global Deep Brain Stimulation in Parkinson's Disease market is characterized by intense competitive conditions with leading companies opting for aggressive marketing to gain market shares. The report presents business descriptions, SWOT analysis, growth strategies, and financial profiles. Leading companies included in the study are Abbott Laboratories, Aleva Neurotherapeutics SA, Beijing Pins Medical Co. Ltd, Boston Scientific Corp, Functional Neuromodulation Ltd, General Electric Co., Medtronic PLC, MicroTransponder Inc, Neuronetics Inc, NeuroPace Inc, NeuroSigma Inc, Nexstim Oy, Renishaw PLC, Siemens AG, St. Jude Medical nc., Synapse Biomedical Inc

### Recent Deep Brain Stimulation in Parkinson's Disease Market Developments

The global Deep Brain Stimulation in Parkinson's Disease market study presents recent market news and developments including new product launches, mergers, acquisitions, expansions, product approvals, and other updates in the industry.
