Abstracts

The global Dental Adhesives and Sealants market size is poised to register 7.8% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Dental Adhesives and Sealants market across By Raw Material (Synthetic Adhesive , Natural Adhesive), By Etching Type (Self-etching Adhesive, Total Etching Adhesive, Others), By Curing (Self Cured, Light Cured, Dual Cured).

The dental adhesives and sealants market is witnessing growth due to increasing demand for restorative and cosmetic dental procedures, advancements in dental materials technology, and rising prevalence of dental caries and periodontal diseases worldwide. Dental adhesives and sealants are dental materials used to bond restorative materials, such as composite resins, porcelain veneers, and dental crowns, to tooth structures, fill cavities, and prevent microleakage and bacterial infiltration at restoration margins. With a focus on dental restoration and preventive dentistry, dentists, prosthodontists, and dental hygienists are utilizing adhesive bonding techniques and sealant applications to enhance restoration longevity, minimize postoperative sensitivity, and preserve tooth structure in restorative and cosmetic dentistry practice, promoting advancements in dental materials science and minimally invasive dentistry approaches.
