Abstracts

The global Dental Cement market size is poised to register 6.66% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Dental Cement market across By Product (Temporary Cement, Permanent Cement), By Material (Glass Ionomer, Zinc Oxide Eugenol, Zinc Phosphate, Polycarboxylate, Composite Resin, Others), By End-User (Hospitals, Dental Clinics, Others).

The dental cement market is experiencing growth due to increasing demand for restorative dentistry, advancements in dental materials technology, and expanding applications in prosthodontics and endodontics. Dental cements are dental materials used to bond restorations, cement crowns and bridges, seal root canal fillings, and lute dental appliances to tooth structures, providing mechanical retention, marginal seal, and long-term stability in dental restorations. With a focus on adhesive dentistry and prosthodontic rehabilitation, dentists, prosthodontists, and endodontists are utilizing dental cement formulations, including resin cements, glass ionomer cements, and zinc oxide-eugenol cements, to ensure durable and esthetic restorations, optimize postoperative outcomes, and preserve tooth integrity in restorative and endodontic procedures, supporting advancements in dental cementation techniques and materials science.
