## **Abstracts**

The global Dental Fillings market size is poised to register 7.25% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Dental Fillings market across By Type (Amalgam, Composites, Glass Ionomer, All-Ceramic, Metal-Ceramic, Metal Alloys, Others).

The dental fillings market is witnessing growth due to increasing prevalence of dental caries, advancements in restorative dentistry materials, and rising demand for minimally invasive dental procedures. Dental fillings, also known as dental restorations or dental composites, are materials used to repair and restore tooth structure damaged by dental caries or trauma, providing esthetic, functional, and durable outcomes in restorative dentistry. With a focus on tooth conservation and esthetic rehabilitation, dentists and dental specialists are utilizing dental filling materials, including composite resins, glass ionomers, and amalgam alloys, to restore tooth integrity, prevent further decay, and preserve natural tooth structure in restorative and cosmetic dentistry practice, promoting advancements in dental materials science and minimally invasive dentistry techniques.
