## **Abstracts**

The global Dental Inlays and Onlays market size is poised to register 9.6% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Dental Inlays and Onlays market across By Material (Porcelain, Zirconia, Gold, Composite), By Type (Direct, Indirect).

The dental inlays and onlays market is witnessing growth due to increasing demand for conservative dental restorations, advancements in CAD/CAM technology, and rising adoption of digital dentistry solutions. Dental inlays and onlays are indirect restorations used to repair and restore large cavities or damaged tooth surfaces, providing durable, esthetic, and minimally invasive alternatives to traditional dental fillings and crowns. With a focus on tooth conservation and biomimetic dentistry, dentists and prosthodontists are utilizing CAD/CAM systems and digital impression technologies to design and fabricate custom-fit inlays and onlays from dental ceramics, composite resins, or metal alloys, offering precise and esthetic restorations, optimal marginal adaptation, and long-term functional outcomes in restorative and cosmetic dentistry practice, supporting advancements in digital dental workflows and chairside milling techniques.
