## **Abstracts**

The global Dermatological OTC Drugs market size is poised to register 11.3% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Dermatological OTC Drugs market across By Indication (Acne, Dermatitis, Psoriasis, Fungal Infections, Others), By Product (Tablets and Capsules, Oils, Gels, Creams, Ointments, Others), By Route of Administration (Oral, Topical), By Distribution Channel (Hospital and Retail Pharmacies, Online Pharmacies, Others)

With the increasing prevalence of skin conditions such as acne, eczema, and fungal infections and the growing consumer demand for self-care products and convenience in managing common dermatological complaints, there is a rising demand for OTC drugs and topical remedies that offer symptom relief and therapeutic benefits for various skin ailments, promoting skin health and well-being without the need for prescription medications. Market growth is driven by factors such as expanding aging population, rising consumer health consciousness, and advancements in formulation technologies and natural ingredients for OTC skincare products. Additionally, the expanding applications of OTC dermatological drugs in acne treatments, antifungal creams, and

moisturizing emollients, as well as the development of combination therapies and personalized skincare regimens for individual skin types and concerns, contribute to market expansion. Further, the emphasis on product safety, efficacy, and regulatory compliance in OTC drug labeling and marketing, along with efforts to enhance consumer education and accessibility to dermatological self-care resources and telemedicine consultations, is expected to further propel market growth in the coming years.
