Abstracts

The global Connected Mobility market size is poised to register 17.98% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The study analyzes the global Connected Mobility market by Technology (Vehicle to Vehicle (V2V), Vehicle to Infrastructure (V2I), Vehicle to Network (V2N), Others), Connectivity (Integrated, Embedded), Application (Navigation, Telematics), Vehicle (Passenger Vehicle, Commercial Vehicle), End-User (OEM, Aftermarket). The Connected Mobility Market is poised for significant evolution and expansion by 2030, driven by a convergence of technological advancements, urbanization trends, and changing consumer behaviors. As cities grapple with congestion, pollution, and transportation challenges, there's a growing interest in connected mobility solutions that offer seamless integration of various transportation modes, real-time data insights, and personalized mobility experiences. Trends such as the rise of electric and shared mobility services, the adoption of smart city initiatives, and advancements in connectivity technologies are reshaping the requirements for connected mobility, driving the need for solutions that provide efficient, sustainable, and inclusive transportation options. In addition, as governments worldwide implement regulations to promote sustainable mobility and reduce carbon emissions, there's a rising emphasis on

connected mobility solutions that prioritize public transit integration, active transportation modes, and mobility-as-a-service (MaaS) platforms. Further, as consumers seek convenient and flexible transportation options, there's an increasing adoption of connected mobility services such as ride-hailing, bike-sharing, and micro-mobility solutions. With stakeholders across the transportation, technology, and urban planning sectors collaborating to create connected and sustainable mobility ecosystems, the Connected Mobility Market is poised for rapid growth and advancement, reshaping the future of urban transportation and mobility experiences..

Connected Mobility Market Drivers, Trends, Opportunities, and Growth Opportunities

This comprehensive study discusses the latest trends and the most pressing challenges for industry players and investors. The Connected Mobility market research analyses the global market trends, key drivers, challenges, and opportunities in the industry. In addition, the latest Future of Connected Mobility survey report provides the market size outlook across types, applications, and other segments across the world and regions. It provides data-driven insights and actionable recommendations for companies in the Connected Mobility industry.

Key market trends defining the global Connected Mobility demand in 2024 and Beyond

The industry continues to remain an attractive hub for opportunities for both domestic and global vendors.
