## **Abstracts**

The global Dysmenorrhea Treatment market size is poised to register 7.3% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Dysmenorrhea Treatment market across By Treatment (Non-steroidal Anti-inflammatory Drugs (NSAIDs), Hormonal Therapy), By Type (Primary Dysmenorrhea, Secondary Dysmenorrhea)

With the increasing prevalence of menstrual pain and the growing recognition of dysmenorrhea as a significant cause of absenteeism and reduced productivity in women of reproductive age, there is a rising demand for dysmenorrhea treatments that provide effective pain relief and improve quality of life during menstruation. Market growth is driven by factors such as expanding awareness of menstrual health and menstrual disorders, rising acceptance of non-pharmacological and complementary therapies for menstrual pain management, and advancements in drug delivery technologies and formulation science for targeted and sustained pain relief. Additionally, the expanding applications of dysmenorrhea treatments in primary dysmenorrhea and secondary dysmenorrhea due to underlying gynecological conditions, as well as the development of menstrual tracking apps and digital health platforms for symptom monitoring and personalized treatment recommendations, contribute to market expansion. Further, the emphasis on menstrual hygiene education, menstrual equity, and culturally sensitive healthcare interventions in menstrual health promotion, along

with efforts to destigmatize menstruation and improve access to affordable and evidence-based dysmenorrhea care in healthcare settings, is expected to further propel market growth in the coming years.
