Abstracts

Global Edible Agar Market Size is valued at \$310.3 Million in 2024 and is forecast to register a growth rate (CAGR) of 6.2% to reach \$502.1 Million by 2032.

The edible agar market is expected to witness growth as a result of the increasing demand for plant-based and vegetarian alternatives in the food industry. Over the forecast period, agar's versatility as a gelling agent in desserts, jellies, and soups will drive its adoption, particularly among health-conscious consumers and those seeking gluten-free options. The rising trend of veganism and clean-label products will further fuel demand, as agar is a natural seaweed-derived ingredient that aligns with the clean eating movement. Additionally, growing awareness of agar's health benefits, such as being low in calories and high in fiber, will boost its popularity.
