Abstracts

Global Edible Lactose Market Size is valued at \$2.4 Billion in 2024 and is forecast to register a growth rate (CAGR) of 8.1% to reach \$4.5 Billion by 2032.

The edible lactose market is expected to grow as the demand for dairy-derived ingredients continues to rise. Over the forecast period, lactose will find applications in food products targeting specific consumer segments, including those looking for functional ingredients that promote digestive health. The trend toward clean-label products will also drive innovation in lactose applications, especially as manufacturers explore lactose's role as a natural sweetener and flavor enhancer in various food categories. Additionally, the growth of the infant nutrition segment will bolster demand for lactose, given its importance in developing infant formulas that mimic natural breast milk.
