Abstracts

Global Emulsified Shortening Market Size is valued at \$311.2 Million in 2024 and is forecast to register a growth rate (CAGR) of 4.4% to reach \$439.2 Million by 2032.

The emulsified shortening market is set to expand as demand for high-quality fats and oils in baked goods and fried products increases. Over the forecast period, the growing trend of premium and artisanal food production will drive the need for emulsified shortening that enhances texture, flavor, and shelf life. Innovations in formulation that reduce trans fats and improve nutritional profiles will cater to health-conscious consumers seeking better options. Additionally, the rise of clean-label products will encourage manufacturers to adopt emulsified shortening made from natural ingredients, aligning with consumer preferences for transparency and quality.
