## Abstracts

The global Foot and Mouth Disease Vaccine market size is poised to register 7.24% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Foot and Mouth Disease Vaccine market across By Product (Conventional Vaccines, Emergency Vaccines), By Animal Type (Cattle, Sheep and goat, Pig, Others).

The foot and mouth disease (FMD) vaccine market is poised for significant growth, propelled by increasing prevalence of FMD outbreaks in livestock populations, rising demand for veterinary vaccines, and growing emphasis on disease prevention and control measures in animal agriculture and food production systems. With a focus on herd immunity, biosecurity measures, and vaccination campaigns, veterinary authorities, livestock producers, and animal health organizations are implementing FMD vaccination programs to protect susceptible animals such as cattle, sheep, pigs, and goats from infection with FMD virus strains and mitigate the economic impact of disease outbreaks on livestock industry stakeholders. Additionally, advancements in vaccine technology, strain selection, and vaccine delivery systems, along with expanding international cooperation in FMD control efforts, emergency preparedness planning, and vaccine stockpiling initiatives, are driving market expansion as stakeholders seek effective, affordable, and regionally tailored vaccines to combat FMD transmission, support trade continuity, and safeguard animal health and welfare in endemic and at-risk regions worldwide.
