Abstracts

The global Galacto oligosaccharide market size is poised to register 10.18% growth (CAGR) from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Galacto oligosaccharide market By Product (Syrup, Powder), By Application (Food and beverages, Dietary supplements, Others).

The future of galacto-oligosaccharides (GOS) is shaped by increasing consumer awareness of gut health, probiotics, and functional foods, driving demand for GOS as a dietary supplement and ingredient in food and beverage products. With growing research demonstrating the role of gut microbiota in overall health and well-being, there is a rising interest in prebiotic fibers such as GOS that can selectively stimulate the growth of beneficial bacteria in the gut. Key trends include the incorporation of GOS into infant formula and dairy products to mimic the prebiotic properties of human milk and support infant gut development and immune function. Additionally, there is a focus on GOS-enriched functional foods and beverages targeting adult consumers seeking digestive health benefits, weight management, and immune support. Moreover, there is ongoing research into the potential therapeutic applications of GOS in managing gastrointestinal disorders such as irritable bowel syndrome (IBS), inflammatory bowel disease (IBD), and constipation, driving further innovation and adoption in the food and nutrition industry..
