## **Abstracts**

High levels of pipeline activity are being observed in Alcohol Addiction treatment during 2019. Clinical development activities are being undertaken by more than 30 companies including AbbVie Inc, Adial Pharmaceuticals LLC, Amygdala Neurosciences Inc, Arbor Pharmaceuticals LLC, Assuage Pharmaceuticals Inc and others.

A Significant contribution to the Alcohol Addiction pipeline is being observed from emerging companies opting for new approaches to clinical development strategy. The early stage and late-stage Alcohol Addiction pipeline included 33 compounds, driven by increasing number of targeted therapies. Progress is being made in accelerating compounds into advanced stages. However, fluctuating trends are being observed in average duration across three phases.

Increased understanding of underlying causes of Alcohol Addiction condition and increased access to investments is encouraging growth of Alcohol Addiction drug pipeline. However, despite high levels of pipeline activity, increasing clinical trial costs and decreasing drug approval rates is requiring companies to focus more on understanding clinical development pipeline compounds.

The research study is structured to provide clear and actionable insights into Alcohol Addiction drug pipeline for companies to optimize spending levels by understanding competition, their pipeline products and prospect of further advances over the next few years.

The report addresses the discovery, research and pre-clinical stage active Alcohol Addiction therapeutic candidates. Further, drugs in clinical stage including phase 1,

phase 2, phase 3 and pre-registration phases are also analyzed.

The current report examines the current Alcohol Addiction pipeline along with current development status, regulatory progress, mechanism of action, route of administration, collaborating companies, sponsors, molecule type, and research/discovery details.

In addition to drug overview, recent developments, the report also provides mechanism of action, Pre-clinical trial details and Clinical trial details for each of the drug candidates of Alcohol Addiction. Further, orphan drug status, fast track designation, grants awarded and other special status for Alcohol Addiction pipeline compounds are also included. This study was produced independently by VPAResearch from our proprietary databases, primarily to assist users to develop in-depth understanding of 2019 Alcohol Addiction pipeline and formulate effective research and development strategies.

## **RESEARCH METHODOLOGY**

Our integrated data reports are built through robust research methodology to ensure our users can build on the insights and data accuracy for their expansion plans. Both primary and secondary research methods are used with stringent quality checks at each stage to evaluate trends, analysis and forecasts.

### Scope of the Research

#### Alcohol Addiction Pipeline candidates-

Pre-clinical Phase: Discovery, research, pre-clinical

Early Phase: Phase 1 and Phase 2 Alcohol Addiction drugs

Late phase: Phase 3 and in-approval Alcohol Addiction drugs

#### Companies involved in the Pipeline-

Company overview

Snapshot

Alcohol Addiction therapeutic treatment activities

Details for each Alcohol Addiction drug candidate-
