Abstracts

High levels of pipeline activity are being observed in Attention Deficit Hyperactivity Disorder (ADHD) treatment during 2019. Clinical development activities are being undertaken by more than 35 companies including 4P-Pharma SAS, Altus Formulation Inc, Amarantus Bioscience Holdings Inc, APeT Holding BV, Arbor Pharmaceuticals LLC and others.

A Significant contribution to the Attention Deficit Hyperactivity Disorder (ADHD) pipeline is being observed from emerging companies opting for new approaches to clinical development strategy. The early stage and late-stage Attention Deficit Hyperactivity Disorder (ADHD) pipeline included 39 compounds, driven by increasing number of targeted therapies. Progress is being made in accelerating compounds into advanced stages. However, fluctuating trends are being observed in average duration across three phases.

Increased understanding of underlying causes of Attention Deficit Hyperactivity Disorder (ADHD) condition and increased access to investments is encouraging growth of Attention Deficit Hyperactivity Disorder (ADHD) drug pipeline. However, despite high levels of pipeline activity, increasing clinical trial costs and decreasing drug approval rates is requiring companies to focus more on understanding clinical development pipeline compounds.

The research study is structured to provide clear and actionable insights into Attention Deficit Hyperactivity Disorder (ADHD) drug pipeline for companies to optimize spending

levels by understanding competition, their pipeline products and prospect of further advances over the next few years.

The report addresses the discovery, research and pre-clinical stage active Attention Deficit Hyperactivity Disorder (ADHD) therapeutic candidates. Further, drugs in clinical stage including phase 1, phase 2, phase 3 and pre-registration phases are also analyzed.

The current report examines the current Attention Deficit Hyperactivity Disorder (ADHD) pipeline along with current development status, regulatory progress, mechanism of action, route of administration, collaborating companies, sponsors, molecule type, and research/discovery details.

In addition to drug overview, recent developments, the report also provides mechanism of action, Pre-clinical trial details and Clinical trial details for each of the drug candidates of Attention Deficit Hyperactivity Disorder (ADHD). Further, orphan drug status, fast track designation, grants awarded and other special status for Attention Deficit Hyperactivity Disorder (ADHD) pipeline compounds are also included.

This study was produced independently by VPAResearch from our proprietary databases, primarily to assist users to develop in-depth understanding of 2019 Attention Deficit Hyperactivity Disorder (ADHD) pipeline and formulate effective research and development strategies.

RESEARCH METHODOLOGY

Our integrated data reports are built through robust research methodology to ensure our users can build on the insights and data accuracy for their expansion plans. Both primary and secondary research methods are used with stringent quality checks at each stage to evaluate trends, analysis and forecasts.

Scope of the Research

Attention Deficit Hyperactivity Disorder (ADHD) Pipeline candidates-

Pre-clinical Phase: Discovery, research, pre-clinical

Early Phase: Phase 1 and Phase 2 Attention Deficit Hyperactivity Disorder (ADHD) drugs

Late phase: Phase 3 and in-approval Attention Deficit Hyperactivity Disorder (ADHD) drugs

Companies involved in the Pipeline-
