Abstracts

Key insights from the Global Bio-herbicides Market-

The Global Bio-herbicides market is valued at \$2 billion in 2020

Permanent Crop types are the dominant users for Bio-herbicides

Nitrogen-fixing Bio-herbicides are the largest types of Bio-herbicides

North America is the largest user of Bio-herbicides

The \$2 billion Bio-herbicides industry presents strong investment and growth opportunities over the near to long term outlook period. The 2020 edition of the market report presents a comprehensive analysis of the global Bio-herbicides market from 2020 to 2028. The Bio-herbicides market research report presents detailed Bio-herbicides market analysis, and forecasts to 2028. Detailed insights into global and regional Bio-herbicides market statistics, Bio-herbicides companies and growth prospects across verticals are included.

Bio-herbicides Market Overview and Developments in 2020

The report presents a snapshot of recent market trends in the Bio-herbicides industry. Further, potential market drivers, major challenges, opportunities, major developments, competitive strategies, porter's five forces analysis, and other analysis are included in

the research.

Impact of COVID-19 on Global Bio-herbicides market revenue

The worldwide crisis of COVID-19 is leading to calls for action from a wide range of stakeholders including manufacturers, vendors, distributors, and consumers. Decline in business for at least three months during 2020 coupled with lower demand from a few major markets has put pressure on the profitability of Bio-herbicides manufacturers and vendors. However, we expect the negative impact of COVID-19 on Bio-herbicides to be compensated over the medium to long term future.

Bio-herbicides Market Size and Outlook by Crop Type to 2028

This chapter presents an insight into different Bio-herbicides types and their contribution to global market growth. The growth in global Bio-herbicides market size is forecast to continue despite the economic challenges. The report forecasts the Bio-herbicides market revenue across different types, which include- Permanent Crops, Arable Crops, Others. Of these, Permanent Crop types dominate the global Bio-herbicides market.

Bio-herbicides Market Size and Outlook by Source to 2028

A long-term perspective indicates that Microbials dominate the Bio-herbicides market. The industry is classified into different Sources including Microbials, Biochemicals, Others.

Global Bio-herbicides Company Profiles

The report presents business profiles of major companies operating in the industry including Valent BioSciences, Marrone Bio Innovations Inc., Emery Oleochemicals, Deer Creek Holdings, Verdesian Life Sciences, Certified Organics Australia PTY Ltd.

The business overview, SWOT profile and product information are provided for all the companies.

The report identifies that the development of new applications and product portfolio is one of the key strategies to overcome identified challenges and for supporting continued growth. Manufacturing companies can also benefit from rising domestic demand in chemical end-use sectors. The majority of the companies are realigning their strategies to orient their business operations to changing market volatility, regulatory policy changes, geopolitical issues, changing end-user preferences, and others.

Sources and Methodology

The data and analysis presented in this report are sourced from a wide range of sources such as associations, manufacturers, suppliers, distributors, consumer

companies, and government sources.

Scope of the research

Global and regional Bio-herbicides Market Size estimates in revenue terms from 2019 to 2028

Segmentation analysis across types, applications, and geographies

Strategic analysis through trends, drivers, challenges, opportunities, porter's five forces analysis

Market Developments including M&A, new product development, and competitive analysis

Potential strategies of leading companies
