Abstracts

Key insights from the Global Defoaming Coating Additives Market-

The Global Defoaming Coating Additives market is valued at \$1 billion in 2020

Silicone-based defoamers are the dominant type of Defoaming Coating Additives

Architectural is the dominant application segment

Asia Pacific is the largest market for Defoaming Coating Additives

The \$1 billion Defoaming Coating Additives industry presents strong investment and growth opportunities over the near to long term outlook period. The 2020 edition of the market report presents a comprehensive analysis of the global Defoaming Coating Additives market from 2020 to 2028. The Defoaming Coating Additives market research report presents detailed Defoaming Coating Additives market analysis, and forecasts to 2028. Detailed insights into global and regional Defoaming Coating Additives market statistics, Defoaming Coating Additives companies and growth prospects across verticals are included.

Defoaming Coating Additives Market Overview and Developments in 2020

The report presents a snapshot of recent market trends in the Defoaming Coating Additives industry. Further, potential market drivers, major challenges, opportunities, major developments, competitive strategies, porter's five forces analysis, and other analysis are included in the research.

Impact of COVID-19 on Global Defoaming Coating Additives market revenue

The worldwide crisis of COVID-19 is leading to calls for action from a wide range of stakeholders including manufacturers, vendors, distributors, and consumers. Decline in business for at least three months during 2020 coupled with lower demand from a few major markets has put pressure on the profitability of Defoaming Coating Additives manufacturers and vendors. However, we expect the negative impact of COVID-19 on Defoaming Coating Additives to be compensated over the medium to long term future.

Defoaming Coating Additives Market Size and Outlook by type to 2028

This chapter presents an insight into different Defoaming Coating Additives types and their contribution to global market growth. The growth in global Defoaming Coating Additives market size is forecast to continue despite the economic challenges. The report forecasts the Defoaming Coating Additives market revenue across different types, which include- Silicone based, Water based, Mineral Oil based, Polymer based, others. Of these, Silicone-based defoamers dominate the global Defoaming Coating Additives market.

Defoaming Coating Additives Market Size and Outlook by application to 2028

A long-term perspective indicates that Architectural dominates the Defoaming Coating Additives market. The industry is classified into different applications including Architectural, Industrial, Furniture, Protective Clothing, Others.

Global Defoaming Coating Additives Company Profiles

The report presents business profiles of major companies operating in the industry including Altana AG, Dow Chemical, Ashland Global Holdings Inc, BASF SE, Elementis Plc.

The business overview, SWOT profile and product information are provided for all the companies.

The report identifies that the development of new applications and product portfolio is one of the key strategies to overcome identified challenges and for supporting continued growth. Manufacturing companies can also benefit from rising domestic demand in

chemical end-use sectors. The majority of the companies are realigning their strategies to orient their business operations to changing market volatility, regulatory policy changes, geopolitical issues, changing end-user preferences, and others.

Sources and Methodology

The data and analysis presented in this report are sourced from a wide range of sources such as associations, manufacturers, suppliers, distributors, consumer companies, and government sources.

Scope of the research

Global and regional Defoaming Coating Additives Market Size estimates in revenue terms from 2019 to 2028

Segmentation analysis across types, applications, and geographies

Strategic analysis through trends, drivers, challenges, opportunities, porter's five forces analysis

Market Developments including M&A, new product development, and competitive analysis

Potential strategies of leading companies
