Abstracts

Key insights from the Global Green Chemicals Market-

The Global Green Chemicals market is valued at \$80 billion in 2020

Health is the largest application segment of the Green Chemicals market

Bio-based Polymers remain the dominant type of green chemicals

Europe is the largest market for Green Chemicals

The \$80 billion Green Chemicals industry presents strong investment and growth opportunities over the near to long term outlook period. The 2020 edition of the market report presents a comprehensive analysis of the global Green Chemicals market from 2020 to 2028. The Green Chemicals market research report presents detailed Green Chemicals market analysis, and forecasts to 2028. Detailed insights into global and regional Green Chemicals market statistics, Green Chemicals companies and growth prospects across verticals are included.

Green Chemicals Market Overview and Developments in 2020

The report presents a snapshot of recent market trends in the Green Chemicals industry. Further, potential market drivers, major challenges, opportunities, major

developments, competitive strategies, porter's five forces analysis, and other analysis are included in the research.

Impact of COVID-19 on Global Green Chemicals market revenue

The worldwide crisis of COVID-19 is leading to calls for action from a wide range of stakeholders including manufacturers, vendors, distributors, and consumers. Decline in business for at least three months during 2020 coupled with lower demand from a few major markets has put pressure on the profitability of Green Chemicals manufacturers and vendors. However, we expect the negative impact of COVID-19 on Green Chemicals to be compensated over the medium to long term future.

Green Chemicals Market Size and Outlook by Type to 2028

This chapter presents an insight into different Green Chemicals types and their contribution to global market growth. The growth in global Green Chemicals market size is forecast to continue despite the economic challenges. The report forecasts the Green Chemicals market revenue across different Types, which include- Bio-based Polymers, Bio-organic Acids, Bio-ketones, others. Of these, Bio-based Polymers dominate the global Green Chemicals market.

Green Chemicals Market Size and Outlook by application to 2028

A long-term perspective indicates that Health application dominates the Green Chemicals market. The industry is classified into different applications including Health, Food Safety, Industrial, Environmental, Others.

Global Green Chemicals Company Profiles

The report presents business profiles of major companies operating in the industry including Cargill Inc, DuPont de Nemours, Inc, INEOS Ltd, Myriant Technologies, Novozymes A/S, Royal DSM N.V.

The business overview, SWOT profile and product information are provided for all the companies.

The report identifies that the development of new applications and product portfolio is one of the key strategies to overcome identified challenges and for supporting continued growth. Manufacturing companies can also benefit from rising domestic demand in chemical end-use sectors. The majority of the companies are realigning their strategies to orient their business operations to changing market volatility, regulatory policy changes, geopolitical issues, changing end-user preferences, and others.

Sources and Methodology

The data and analysis presented in this report are sourced from a wide range of sources such as associations, manufacturers, suppliers, distributors, consumer companies, and government sources.

Scope of the research

Global and regional Green Chemicals Market Size estimates in revenue terms from 2019 to 2028

Segmentation analysis across types, applications, and geographies

Strategic analysis through trends, drivers, challenges, opportunities, porter's five forces analysis

Market Developments including M&A, new product development, and competitive analysis

Potential strategies of leading companies
