Abstracts

High levels of pipeline activity are being observed in Narcolepsy treatment during 2019. Clinical development activities are being undertaken by more than 20 companies including Avadel Pharmaceuticals Plc, Axsome Therapeutics Inc, Balance Therapeutics Inc, Bioprojet SCR, Evotec AG and others.

A Significant contribution to the Narcolepsy pipeline is being observed from emerging companies opting for new approaches to clinical development strategy. The early stage and late-stage Narcolepsy pipeline included 20 compounds, driven by increasing number of targeted therapies. Progress is being made in accelerating compounds into advanced stages. However, fluctuating trends are being observed in average duration across three phases.

Increased understanding of underlying causes of Narcolepsy condition and increased access to investments is encouraging growth of Narcolepsy drug pipeline. However, despite high levels of pipeline activity, increasing clinical trial costs and decreasing drug approval rates is requiring companies to focus more on understanding clinical development pipeline compounds.

The research study is structured to provide clear and actionable insights into Narcolepsy drug pipeline for companies to optimize spending levels by understanding competition, their pipeline products and prospect of further advances over the next few years.

The report addresses the discovery, research and pre-clinical stage active Narcolepsy therapeutic candidates. Further, drugs in clinical stage including phase 1, phase 2,

phase 3 and pre-registration phases are also analyzed.

The current report examines the current Narcolepsy pipeline along with current development status, regulatory progress, mechanism of action, route of administration, collaborating companies, sponsors, molecule type, and research/discovery details.

In addition to drug overview, recent developments, the report also provides mechanism of action, Pre-clinical trial details and Clinical trial details for each of the drug candidates of Narcolepsy. Further, orphan drug status, fast track designation, grants awarded and other special status for Narcolepsy pipeline compounds are also included.

This study was produced independently by VPAResearch from our proprietary databases, primarily to assist users to develop in-depth understanding of 2019 Narcolepsy pipeline and formulate effective research and development strategies.

RESEARCH METHODOLOGY

Our integrated data reports are built through robust research methodology to ensure our users can build on the insights and data accuracy for their expansion plans. Both primary and secondary research methods are used with stringent quality checks at each stage to evaluate trends, analysis and forecasts.

Scope of the Research

Narcolepsy Pipeline candidates-

Pre-clinical Phase: Discovery, research, pre-clinical

Early Phase: Phase 1 and Phase 2 Narcolepsy drugs

Late phase: Phase 3 and in-approval Narcolepsy drugs
