Abstracts

High levels of pipeline activity are being observed in Vaso-Occlusive Crisis Associated With Sickle Cell Disease treatment during 2019. Clinical development activities are being undertaken by more than 10 companies including AstraZeneca Plc, bluebird bio Inc, Global Blood Therapeutics Inc, Hillhurst Biopharmaceuticals Inc, Imara Inc and others.

A Significant contribution to the Vaso-Occlusive Crisis Associated With Sickle Cell Disease pipeline is being observed from emerging companies opting for new approaches to clinical development strategy. The early stage and late-stage Vaso-Occlusive Crisis Associated With Sickle Cell Disease pipeline included 12 compounds, driven by increasing number of targeted therapies. Progress is being made in accelerating compounds into advanced stages. However, fluctuating trends are being observed in average duration across three phases.

Increased understanding of underlying causes of Vaso-Occlusive Crisis Associated With Sickle Cell Disease condition and increased access to investments is encouraging growth of Vaso-Occlusive Crisis Associated With Sickle Cell Disease drug pipeline. However, despite high levels of pipeline activity, increasing clinical trial costs and decreasing drug approval rates is requiring companies to focus more on understanding clinical development pipeline compounds.

The research study is structured to provide clear and actionable insights into Vaso-Occlusive Crisis Associated With Sickle Cell Disease drug pipeline for companies to

optimize spending levels by understanding competition, their pipeline products and prospect of further advances over the next few years.

The report addresses the discovery, research and pre-clinical stage active Vaso-Occlusive Crisis Associated With Sickle Cell Disease therapeutic candidates. Further, drugs in clinical stage including phase 1, phase 2, phase 3 and pre-registration phases are also analyzed.

The current report examines the current Vaso-Occlusive Crisis Associated With Sickle Cell Disease pipeline along with current development status, regulatory progress, mechanism of action, route of administration, collaborating companies, sponsors, molecule type, and research/discovery details.

In addition to drug overview, recent developments, the report also provides mechanism of action, Pre-clinical trial details and Clinical trial details for each of the drug candidates of Vaso-Occlusive Crisis Associated With Sickle Cell Disease. Further, orphan drug status, fast track designation, grants awarded and other special status for Vaso-Occlusive Crisis Associated With Sickle Cell Disease pipeline compounds are also included.

This study was produced independently by VPAResearch from our proprietary databases, primarily to assist users to develop in-depth understanding of 2019 Vaso-Occlusive Crisis Associated With Sickle Cell Disease pipeline and formulate effective research and development strategies.

RESEARCH METHODOLOGY

Our integrated data reports are built through robust research methodology to ensure our users can build on the insights and data accuracy for their expansion plans. Both primary and secondary research methods are used with stringent quality checks at each stage to evaluate trends, analysis and forecasts.

Scope of the Research

Vaso-Occlusive Crisis Associated With Sickle Cell Disease Pipeline candidates-

Pre-clinical Phase: Discovery, research, pre-clinical

Early Phase: Phase 1 and Phase 2 Vaso-Occlusive Crisis Associated With Sickle Cell Disease drugs

Late phase: Phase 3 and in-approval Vaso-Occlusive Crisis Associated With Sickle Cell Disease drugs

Companies involved in the Pipeline-
