Abstracts

The global Granisetron market size is poised to register 5.3% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Granisetron market across By Product (Transdermal system, Injection, Oral), By Application (Chemotherapy, Post-operative), By Distribution Channel (Hospitals, Drug Stores, Others)

The Granisetron market is experiencing notable growth driven by the rising incidence of chemotherapy-induced nausea and vomiting (CINV) and the expanding oncology therapeutics landscape. Granisetron, a selective serotonin receptor antagonist, remains a cornerstone in the management of CINV, owing to its efficacy and tolerability profile. Further, advancements in drug delivery systems, such as transdermal patches and extended-release formulations, are enhancing patient convenience and compliance. By 2030, the market is anticipated to witness further growth, propelled by the increasing adoption of multimodal antiemetic regimens and the development of novel combination therapies targeting multiple pathways involved in CINV.
