Abstracts

The global Gum Lift market size is poised to register 7.8% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Gum Lift market across By Type (Gingivectomy, Gingival Flap Surgery, Gingivoplasty, Gum Graft, Gum Regeneration).

The gum lift market is experiencing steady growth, driven by increasing demand for aesthetic dentistry procedures, rising awareness of smile enhancement techniques, and technological advancements in soft tissue laser surgery and minimally invasive gum contouring techniques. A gum lift, also known as gingival recontouring or crown lengthening, is a cosmetic dental procedure aimed at reshaping and recontouring the gum line to improve the appearance of the teeth and smile. With a focus on achieving harmony, symmetry, and balance in the smile aesthetics, cosmetic dentists and periodontists are utilizing laser gum lifts, scalpel techniques, and tissue sculpting procedures to address excess gum tissue, uneven gum margins, and gummy smiles in patients seeking smile makeovers and facial rejuvenation. Additionally, advancements in digital smile design, computer-guided surgery, and patient-specific treatment planning, along with expanding patient demand for minimally invasive and painless dental procedures, are driving market expansion as stakeholders aim to deliver natural-looking, long-lasting, and aesthetically pleasing results in cosmetic dentistry and smile enhancement procedures.
