Abstracts

The global Gynecomastia Procedures market size is poised to register 8.86% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Gynecomastia Procedures market across By Age Group (18 to 40, Above 40), By Procedure (Liposuction, Excision), By End-User (Hospitals, Cosmetic surgery center).

The gynecomastia procedures market is experiencing notable growth, propelled by increasing prevalence of gynecomastia, rising awareness of male breast reduction treatments, and advancements in surgical techniques and body contouring procedures. Gynecomastia, characterized by enlargement of the male breast tissue, is a common condition that can cause physical discomfort, psychological distress, and body image concerns in affected individuals. With a focus on restoring chest aesthetics, improving self-confidence, and addressing functional concerns, plastic surgeons and cosmetic surgeons are performing gynecomastia procedures such as liposuction, gland excision, and skin tightening to reduce breast volume, contour the chest contours, and achieve masculine chest proportions in male patients seeking surgical correction of gynecomastia. Additionally, advancements in minimally invasive techniques, scarless approaches, and adjunctive technologies such as laser lipolysis and ultrasound-assisted liposuction, along with expanding patient awareness of treatment options and growing acceptance of male aesthetic procedures, are driving market expansion as stakeholders aim to meet the evolving needs and preferences of men seeking gynecomastia treatment and body contouring solutions for aesthetic enhancement and improved

quality of life.
