## **Abstracts**

The global Health Caregiving market size is poised to register 11.2% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Health Caregiving market across By Type (Daily Essential Activities, Health and Safety Awareness, Social Well-Being, Others), By End-User (Geriatric Population, Disabled Population, Others)

The Health Caregiving market is undergoing a transformation driven by demographic shifts, changing family structures, and advancements in technology-enabled care solutions. As the global population ages, the demand for caregiving services, including home care, long-term care, and palliative care, is on the rise. The market is characterized by a growing number of informal caregivers, as well as professional caregivers, seeking support and resources to provide quality care to aging loved ones and patients with chronic illnesses. Further, digital health platforms and remote monitoring technologies are empowering caregivers with tools for medication management, health tracking, and communication with healthcare providers. By 2030, the market is expected to witness further growth as stakeholders collaborate to address the evolving needs of caregivers and enhance the quality of care delivery across diverse settings.
