Abstracts

The global Healthcare Cold Plasma Therapy market size is poised to register 15.2% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Healthcare Cold Plasma Therapy market across By Application (Wound Healing, Surgical Application, Others)

The Healthcare Cold Plasma Therapy market is experiencing rapid growth driven by the expanding applications of cold atmospheric plasma (CAP) technology in wound healing, infection control, and cancer therapy. Cold plasma, a unique state of matter, exhibits antimicrobial, anti-inflammatory, and tissue-regenerative properties, making it promising for various medical applications. The market is driven by the rising incidence of chronic wounds, infections, and skin disorders, as well as the growing demand for non-invasive and cost-effective treatment modalities. Further, advancements in plasma technology, including portable and handheld devices, are enhancing accessibility and usability in clinical settings. By 2030, the market is poised for significant growth as stakeholders explore new therapeutic avenues and clinical indications for cold plasma therapy, including dermatology, oncology, and dentistry.
