Abstracts

The global Healthcare Equipment Leasing market size is poised to register 17.72% growth (CAGR) from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Healthcare Equipment Leasing market By Product (Durable Medical Equipment, Surgical and Therapy Equipment, Personal and Home-Care Equipment, Digital and Electronic Equipment, Storage and Transport Equipment), By End-User (Hospitals, Diagnostic Centers, Clinics, Others).

The future of healthcare equipment leasing is driven by the need for cost-effective financing solutions, flexibility in equipment procurement, and access to state-of-the-art medical technologies. Key trends include the growth of leasing options for capital-intensive equipment such as MRI machines, CT scanners, and surgical robots, allowing healthcare providers to conserve capital, manage cash flow, and avoid obsolescence risks. Additionally, the rise of leasing models tailored to specific healthcare sectors, such as hospitals, imaging centers, and ambulatory surgery centers, is enabling customized lease terms, bundled service contracts, and equipment upgrades to meet evolving clinical needs and regulatory requirements. Moreover, the integration of leasing

with value-based care models and population health initiatives is driving demand for leased equipment that supports preventive care, chronic disease management, and telemedicine services, aligning with healthcare organizations' goals of improving patient outcomes and reducing costs..
