Abstracts

The global Hip Replacement market size is poised to register 5.8% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Hip Replacement market across By Procedure (Total Hip Replacement, Partial Hip Replacement, Revision Hip Replacement, Hip Resurfacing), By Material (Metal-on-Metal, Metal-on-Polyethylene, Ceramic-on-Polyethylene, Ceramic-on-Metal, Ceramic-on-Ceramic), By End-User (Hospitals, Orthopedic Clinics, Ambulatory Surgery Centers)

The Hip Replacement market is evolving with the increasing demand for joint replacement surgeries to alleviate pain, restore mobility, and improve quality of life in patients with hip osteoarthritis, fractures, and other musculoskeletal conditions. Hip replacement surgery, also known as total hip arthroplasty (THA), involves the removal of damaged hip joint components and their replacement with artificial implants made of metal alloys, ceramics, or specialized plastics. The market is driven by demographic trends, including the aging population and rising prevalence of hip-related disorders, as well as advancements in implant design, materials, and surgical techniques that enhance implant longevity and functional outcomes. Further, the shift towards outpatient

joint replacement procedures, bundled payment models, and enhanced recovery protocols is driving market innovation and adoption. By 2030, the market is expected to witness further growth as healthcare systems optimize joint replacement pathways, expand access to surgical services, and leverage digital technologies to enhance patient engagement and shared decision-making in orthopedic care.
