Abstracts

Hypoparathyroidism is relatively rare form of thyroid disorders, expected to affect around 60,000 people in the US. The disease is caused when parathyroid glands fails to produce PTH (parathyroid hormone). The primary cause of failure of the parathyroid glands is often removal of parathyroid glands by surgery. Though rarely, family history, congenital diseases or auto-immune diseases can cause failure of the glands.

The disease is classified into two categories based on the cause of occurrence-

- Iatrogenic Hypoparathyroidism- arising from known causes such as surgery

- Idiopathic Hypoparathyroidism- unknown causes

 - Congenital (during birth)

 - Inheritance (family history)

 - Auto-immune (due to auto-antibodies)

 - Genetic

Failure to produce required levels of PTH leads to decline in calcium and phosphorous in patients. The condition is also generally associated with renal diseases, stones in kidneys, cataracts and calcification of soft tissues.

Key symptoms observed in Hypoparathyroidism glands include numbness, irregular

heartbeats, cramps and seizures.

Drugs- Often Vitamin D analogue together with a Calcium supplement are administered to patients with Hypoparathyroidism.

Hypoparathyroidism clinical trials report from VPA Research provides comprehensive analysis and trends in global Hypoparathyroidism disease clinical trials. The research work analyzes the evolution of Hypoparathyroidism clinical trial trends across countries and regions.

The report focuses on drugs and therapies being evaluated for Hypoparathyroidism treatment in active clinical development phases including phase 1, phase 2, phase 3 and phase 4 clinical trials. The report also provides trials information by region, key countries, phases, trial status and sponsor types.

Our experienced database team dynamically updates the clinical trials data from several sources including Clinical trial registries, conferences, journals and company releases etc. Further, data is presented in user friendly manner offering quick access to Hypoparathyroidism clinical trials.
