## **Abstracts**

The global Influenza Treatment market size is poised to register 4.13% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Influenza Treatment market across By Treatment (Peramivir, Zanamivir, Baloxavir Marboxil, Oseltamivir Phosphate, Others), By Route of Administration (Oral, Others), By Distribution Channel, Hospital Pharmacies, Retail Pharmacies, Online Pharmacies).

The Influenza Treatment market is witnessing significant growth due to the seasonal and pandemic threat posed by influenza viruses, increasing demand for effective treatment options, and advancements in antiviral therapies. Influenza, commonly known as the flu, is a contagious respiratory illness caused by influenza viruses, with symptoms ranging from mild to severe and potentially life-threatening complications. Factors such as the unpredictability of influenza strains, the emergence of drugresistant viruses, and the need for early and targeted treatment are driving the demand for influenza therapies. Additionally, advancements in antiviral drug development, the discovery of novel drug targets, and the repurposing of existing medications for influenza treatment are shaping the landscape of influenza therapeutics. Moreover, the growing emphasis on antiviral treatment as part of influenza management strategies, the expansion of vaccination programs, and the implementation of public health

measures to prevent and control influenza outbreaks are driving market growth. Furthermore, efforts to develop next-generation antiviral agents, improve treatment efficacy and safety profiles, and enhance global preparedness for influenza pandemics are expected to further accelerate market expansion in the coming years.
