Abstracts

Global Interesterified Fats Market Size is valued at \$275.1 Million in 2024 and is forecast to register a growth rate (CAGR) of 4.9% to reach \$403.4 Million by 2032.

The Interesterified Fats Market is growing due to the increasing demand for healthier fat alternatives in food products. As consumers become more health-conscious, the focus on reformulating products to reduce trans fats and saturated fats is driving manufacturers to adopt interesterification as a preferred method for improving the nutritional profile of fats. Additionally, the versatility of interesterified fats in various applications, from baking to frying, is attracting attention from food manufacturers seeking to enhance product quality while maintaining desirable taste and texture. Moreover, the trend towards clean label products is prompting the development of interesterified fats made from natural sources, aligning with consumer preferences for transparency in food ingredients.
